

Список основных публикаций работников ведущей организации Федеральное государственное бюджетное учреждение науки Институт цитологии Российской Академии наук по теме диссертации в рецензируемых научных изданиях за 2016–2020 гг.

1. Maltseva A.L., Varfolomeeva M.A., Lobov A.A., Tikanova P.O., Repkin E.A., Babkina I.Y., Panova M., Mikhailova N.A., Granovitch A.I. Premating barriers in young sympatric snail species // *Scientific Reports*. 2021. Vol. 11. Article No. 5720.
2. Sharlaimova N., Shabelnikov S., Bobkov D., Martynova M., Bystrova O., Petukhova O. Coelomocyte replenishment in adult *Asterias rubens*: the possible ways // *Cell and Tissue Research*. 2020. Vol. 383. P. 1043–1060.
3. Lobov A.A., Yudincheva N.M., Mittenberg A.G., Shabelnikov S.V., Mikhailova N.A., Malashicheva A.B., Khotin M.G. Proteomic profiling of the human fetal multipotent mesenchymal stromal cells secretome // *Molecules*. 2020. Vol. 25, № 22. Article No. 5283.
4. Demin S.I., Bogolyubov D.S., Granovitch A.I., Mikhailova N.A. New data on spermatogenic cyst formation and cellular composition of the testis in a marine gastropod *Littorina saxatilis* // *International Journal of Molecular Sciences*. 2020. Vol. 21, № 11. Article No. 3792.
5. Aleksandrova S.A., Nashchekina Yu.A., Nadezhdin S.V., Vasiliev S.A., Savchenko R.R., Pokrovskaya L.A., Blinova M.I., Mikhailova N.A., Khotin M.G. Osteoinductive properties of secretome of human mesenchymal stem cells, obtained with automatic cell culture system // *Cell and Tissue Biology*. 2020. Vol. 14, № 6, P. 474–482.
6. Lobov A., Babkina I., Maltseva A., Mikhailova N., Granovitch A. Proteins of penial mamilliform glands in closely related *Littorina* species (Mollusca, Caenogastropoda): variability and possible contribution to reproductive isolation // *Biological Communications*. 2020. Vol. 65, № 2, P. 200–212.
7. Maltseva A.L., Varfolomeeva M.A., Lobov A.A., Tikanova P., Panova M., Mikhailova N.A., Granovitch A.I. Proteomic similarity of the Littorinid snails in the evolutionary context // *PeerJ*. 2020. Vol. 8. Article No. e8546.
8. Shabelnikov S.V., Bobkov D.E., Sharlaimova N.S., Petukhova O.A. Injury affects coelomic fluid proteome of the common starfish *Asterias rubens* // *Journal of Experimental Biology*. 2019. Vol. 222. Article No. jeb198556.
9. Daugavet M.A., Adonin L.S., Podgornaya O., Shabelnikov S., Shumeev A., Shaposhnikova T. Features of a novel protein, rusticalin, from the ascidian *Styela rustica* reveal ancestral horizontal gene transfer event // *Mobile DNA*. 2019. Vol. 10, № 1. Article No. 4.
10. Shatrov A.B., Soldatenko E.V., Smirnov P.A., Stolbov V.A., Petukhova O.A. Ultrastructure and functional morphology of dermal glands in the freshwater mite *Limnochares aquatica* (L., 1758) (Acariformes, Limnocharidae) // *Arthropod Structure and Development*. 2019. Vol. 49. P. 85–102.
11. Martynova M.G., Petukhova O.A., Sharlaimova N.S., Shabelnikov S.V., Bystrova O.A. Components of corticotropin-releasing factor (CRF) signaling system in snail atria // *Cell and Tissue Biology*. 2018. Vol. 12, № 4. P. 342–349.
12. Muraeva O., Maltseva A., Varfolomeeva M., Mikhailova N., Granovitch A. Mild osmotic stress in intertidal gastropods *Littorina saxatilis* and *Littorina obtusata* (Mollusca: Caenogastropoda): a proteomic analysis // *Biological Communications*. 2017. Vol. 62, № 3. P. 202–213.
13. Sharlaimova N.S., Petukhova O.A. The small cells of coelomic fluid and coelomic epithelium isolated from starfish *Asterias rubens* and *Asterias amurensis* (Echinodermata: Asteroidea): comparative analysis of cell morphology and proliferative activity *in vivo* and *in vitro* // *Russian Journal of Marine Biology*. 2016. Vol. 42, № 2. P. 199–203.
14. Maltseva A.L., Varfolomeeva M.A., Lobov A.A., Mikhailova N.A., Renaud P.E., Grishankov A.V., Volovik K.Y., Granovitch A.I. Measuring physiological similarity of closely related littorinid species: A proteomic insight // *Marine Ecology Progress Series*. 2016. Vol. 552. P. 177–193.
15. Shabelnikov S. Nerve-granular cell communication in the atrium of the snail *Achatina achatina* occurs via the cardioexcitatory transmitters serotonin and FMRFamide // *Cell Tissue Res*. 2016. Vol. 366. P. 245–254.
